

A-Level Revision - GCE Advanced Level Practice Test Questions and Answers

1. What is Ohm's Law?

- A) Power = voltage \times current
- B) Voltage = current \times resistance ($V = IR$), for ohmic conductors at constant temperature
- C) Resistance = voltage \div current
- D) Current = resistance \div voltage

2. What is a nucleophile?

- A) An electron-pair acceptor with a positive charge
- B) An electron-pair donor — a species rich in electrons that attacks electron-deficient ($\delta+$) carbon atoms
- C) A type of catalyst in organic reactions
- D) A species that only reacts with alkenes

3. What is dramatic irony?

- A) When the audience knows something that the characters on stage do not
- B) When a character says the opposite of what they mean
- C) When events turn out contrary to expectation
- D) When the narrator addresses the audience directly

4. What is pathetic fallacy?

- A) The attribution of human emotions to nature or weather to reflect the mood of characters or events
- B) A logical error in an argument
- C) The use of animals to represent human characteristics
- D) A deliberately misleading statement by the narrator

Answers: 1-B 2-B 3-A 4-A
