

AP Physics Practice Test Questions and Answers

1. What is entropy?

- A) The total energy of a system
- B) The amount of heat transferred
- C) The disorder or randomness of a system
- D) The temperature of a system

2. What is Ohm's Law?

- A) $V = I/R$
- B) $V = I * R$
- C) $V = I + R$
- D) $V = R * I$

3. What is refraction?

- A) Reflection of light
- B) Bending of light due to density change
- C) Absorption of light
- D) Transmission of light

4. What is diffraction?

- A) Reflection of light at edges
- B) Bending of waves around obstacles
- C) Absorption of sound waves
- D) Transmission of light

Answers: 1-C 2-B 3-B 4-B
