

# CASP+ - CompTIA Advanced Security Practitioner Practice Test Questions and Answers

**1. Which hashing algorithm among the following is the most powerful?**

- A) DES
- B) MD5
- C) AES
- D) SHA-256

**2. Which key exchange protocol provides perfect forward secrecy (PFS)?**

- A) RSA key exchange
- B) Static Diffie-Hellman (DH)
- C) Ephemeral Diffie-Hellman (DHE) or ECDHE
- D) Pre-shared key (PSK) exchange

**3. Which of the following DOES NOT fall under a GDPR data classification?**

- A) Internal only
- B) Public
- C) Confidential
- D) Symmetric

**4. A TLS 1.3 handshake eliminates which legacy feature compared to TLS 1.2?**

- A) Certificate-based authentication
- B) The use of asymmetric cryptography
- C) RSA key exchange (non-forward-secret)
- D) Digital signatures on the handshake

**Answers: 1-D 2-C 3-D 4-C**
