

CCSK Practice Test Questions and Answers

1. Scoping and review activities can be sped up by:

- A) Obtaining a letter of attestation
- B) Engaging auditors with experience in the cloud space.
- C) Relying on certifications instead of audits
- D) Outsourcing audits to a "Big 5" auditing shop

2. What is 'vendor lock-in' from a security perspective in CCSK?

- A) A security feature that prevents unauthorized access to cloud accounts
- B) Dependence on proprietary cloud services that makes migration difficult, potentially forcing continued use of a provider with degraded security posture
- C) A compliance requirement mandating use of a single cloud provider
- D) A contractual clause that prohibits customers from auditing providers

3. Which CSA domain covers the security implications of cloud APIs?

- A) Domain 4: Compliance and Audit Management
- B) Domain 7: Infrastructure Security
- C) Domain 10: Application Security
- D) Domain 12: Identity, Entitlement and Access Management

4. What is 'data sovereignty' in the context of CCSK cloud security?

- A) A cloud provider's right to use customer data for analytics
- B) The legal principle that data is subject to the laws of the country where it is stored
- C) A customer's right to delete their data at any time
- D) The ability to encrypt data across international borders

Answers: 1-B 2-B 3-C 4-B
