

ECG Practice Test Questions and Answers

1. What is Holter monitoring?

- A) Continuous ambulatory ECG recording over 24-48 hours to detect intermittent arrhythmias
- B) A one-time resting ECG
- C) An exercise stress test
- D) An echocardiogram procedure

2. The QT interval represents:

- A) Atrial depolarization only
- B) Total ventricular depolarization and repolarization
- C) AV nodal conduction time
- D) Sinoatrial conduction time

3. Which way does lead II go on an ECG?

- A) 90 degrees
- B) 0 degrees
- C) 30 degrees
- D) 60 degrees

4. The ST segment on the ECG represents:

- A) Atrial repolarization
- B) The period between ventricular depolarization and repolarization (plateau phase)
- C) P-wave production
- D) His-Purkinje conduction

Answers: 1-A 2-B 3-D 4-B
