

MD-101 Practice Test Questions and Answers

1. What is the deadline setting in a Windows Update Ring used for?

- A) To set the last day Microsoft supports the update
- B) To force devices to install updates by a specific number of days after the update becomes available, overriding active hours if needed
- C) To schedule a compliance audit after updates are applied
- D) To notify users of upcoming update restarts

2. What is the primary function of Windows Update for Business (WUfB)?

- A) To host Windows update files on-premises for bandwidth savings
- B) To control when and how Windows updates are deployed to devices using policy
- C) To replace WSUS for all organizations with cloud-only deployments
- D) To allow end users to choose their own update schedule

3. What is 'MAM without enrollment' (MAM-WE) specifically designed for?

- A) Enrolling devices without user interaction
- B) Protecting corporate data in Office apps on personal (BYOD) devices that are not enrolled in Intune MDM
- C) Applying compliance policies to unenrolled devices
- D) Deploying apps to devices that cannot enroll

4. What does the Intune compliance policy 'grace period' setting control?

- A) How long a device can remain offline before being marked non-compliant
- B) The number of days a non-compliant device retains access before Conditional Access blocks it
- C) How long a user has to enroll their device after joining Azure AD
- D) The time between compliance evaluation cycles

Answers: 1-B 2-B 3-B 4-B
