

Ramsay Practice Test Questions and Answers

1. Which tool would be most appropriate for measuring electrical current in a circuit?

- A) Voltmeter
- B) Ammeter
- C) Ohmmeter
- D) Wattmeter

2. In mechanical systems, what is the primary function of a bearing?

- A) To increase speed
- B) To reduce friction between moving parts
- C) To provide electrical insulation
- D) To control temperature

3. What does a relay do in an electrical circuit?

- A) Converts AC to DC
- B) Acts as an electrically operated switch
- C) Measures voltage
- D) Stores electrical energy

4. In hydraulic systems, what happens when you increase the pressure?

- A) Flow rate decreases
- B) Temperature increases
- C) Force output increases
- D) Viscosity decreases

Answers: 1-B 2-B 3-B 4-C
