

UK LGV Theory Test Practice Test Questions and Answers

1. What is brake hysteresis?

- A) The sound brakes make when applied
- B) The difference between braking force during application and release — important for smooth, controlled braking
- C) A type of brake disc
- D) The time taken to replace brake pads

2. What is a 'packing group' in ADR?

- A) A classification (I, II, or III) indicating the danger level of the goods — Group I is most dangerous
- B) The number of packages in a consignment
- C) The type of container used for packing
- D) The maximum weight per package

3. What is a 'retarder' on a modern LGV?

- A) An auxiliary braking device (hydraulic or electromagnetic) that supplements the main brakes, especially on long descents
- B) A device that reduces engine power
- C) An automatic speed limiter
- D) A braking system that replaces ABS

4. How does an exhaust brake work on an HGV?

- A) It applies pressure to the exhaust pipe
- B) It restricts the exhaust flow, creating back-pressure that uses the engine as a retarder to slow the vehicle
- C) It releases exhaust gas onto the road surface for grip
- D) It increases exhaust emissions to slow down

Answers: 1-B 2-A 3-A 4-B
